Towel Warmer

Warmth reaches new heights.

The phrase “stand tall” refers to the ability to be brave, proud and confident. With a beautiful Polished Stainless Steel finish and 10 sleek bars, the Metropolitan towel warmer fulfills all of these characteristics. However, it also literally stands tall, because it is the tallest towel warmer in WarmlyYours’ portfolio. For this reason, it can comfortably accommodate large towels and bathrobes in order to wrap you up in luxurious warmth after every bath or shower.

The Metropolitan will also take your bathroom one step closer toward that spa-like ambiance. Its simple, modern appearance complements any bathroom décor and mounts easily to the wall. Just hardwire it into a 120-volt circuit, and your bathroom will never be the same again.

Programmable Timer Control

The hardwired Metropolitan Towel Warmer comes standard with a programmable timer control. This value-added feature allows you to set a time each day for your towel warmer to heat up, so that when you’re ready to step out of the shower or tub, a toasty warm towel will be ready to comfort you.
