Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with your packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the needed parts are included in the package by checking off the components on the "Detailed Diagram of Shower Door Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. Please note that **DreamLine® will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed.** Please contact DreamLine® if you have any questions and please provide an order number, job name or other proof of purchase to help identify the original order.

2. Install all of the required plumbing and drainage before installing the shower base. **Use a competent and licensed (if required by local code) plumber for all plumbing installation.**

3. **Shower bases must be installed by a licensed plumber. Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location and DreamLine® is not responsible for code compliance standards for your project.**

4. Make sure that prior to the installation the installation surface is leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. While some adjustment in leveling of the tray is possible, irregular installation surface level or improper angle of side walls will result in serious problems for your installation. Please note that some adjustments may be necessary during the installation process.

5. **Center drain configurations are centered on the width only. See technical drawing tables for drain locations.**

6. **Drain not included with this product.** The drain *opening* is 3-3/8" in diameter and **accepts a standard 2" compression fitted drain.**

IMPORTANT NOTE:

Dimensions provided are for reference only. Measure the actual shower tray before installation. This includes overall dimensions and drain location. Allowed tolerance for center of the drain is +/-1/2".

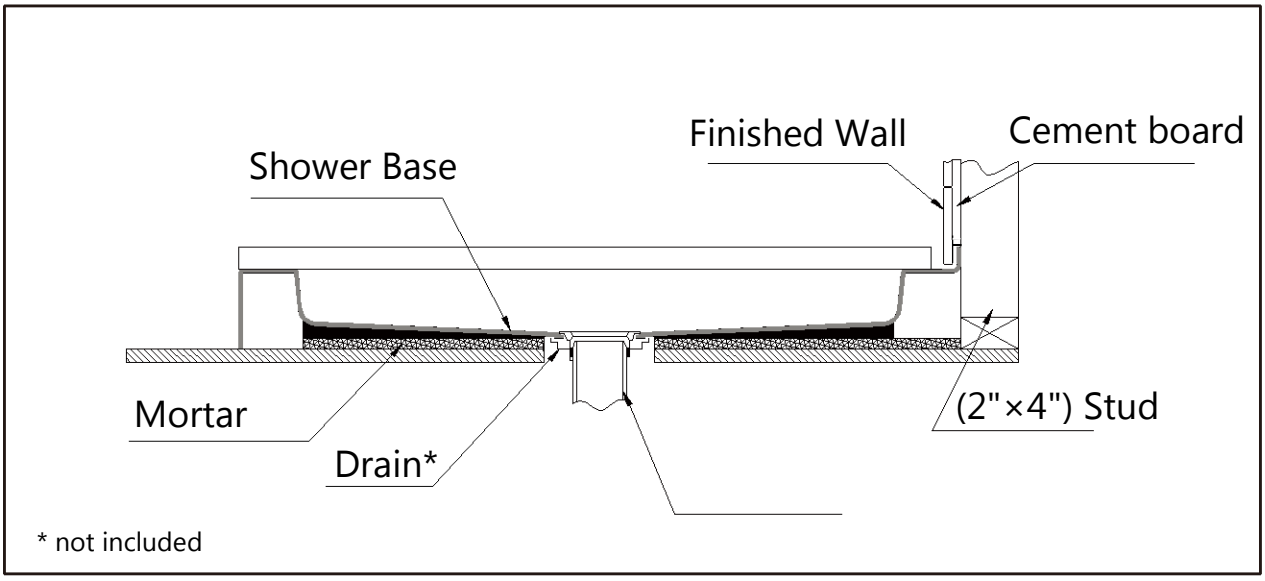
Shower Base Cross Section Diagram



©2018 DreamLine. All Rights Reserved

Shower Base Installation - Preparation

1. Ensure that the floor and the studs are at right angles.
   Provide a 5″×5″ opening in the sub-floor for the drain.
   The 2″ PVC waste pipe should extend above the surface of the sub-floor according to the drain installation instructions and the height of the Shower base.
   Refer to the product drawings and tables in this installation manual for the drain location.

   See Fig. 1 and Fig. 2 for details.

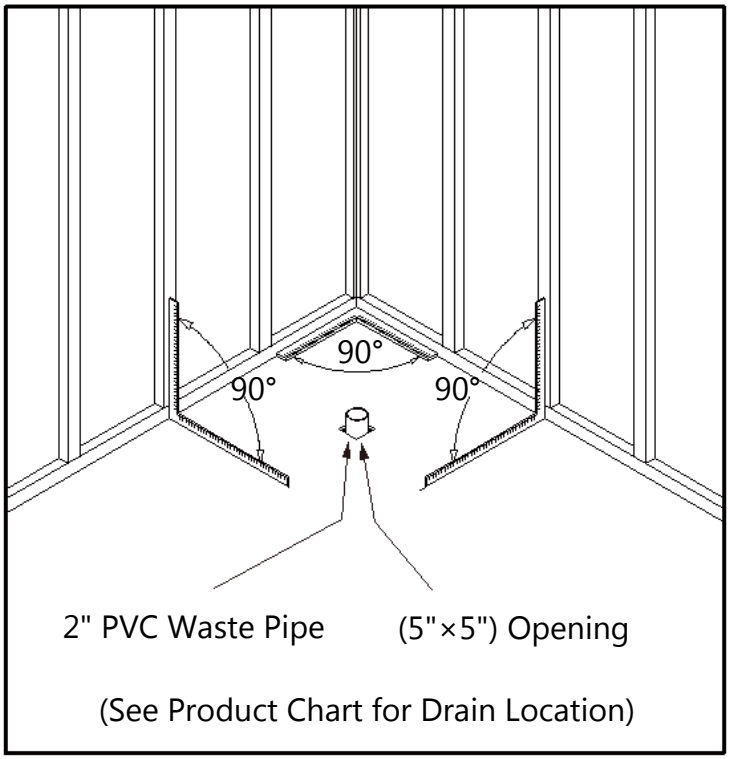


Fig. 1

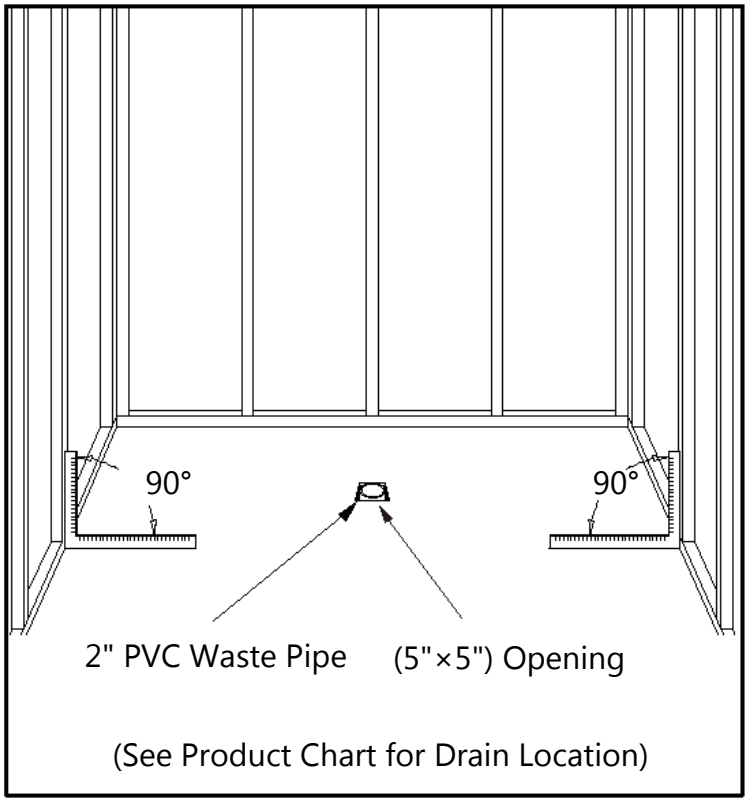

Fig. 2

©2018 DreamLine. All Rights Reserved

2. Install the shower drain **(NOT INCLUDED)** according to the drain installation manual (supplied with the drain).

   See Fig. 3 for example

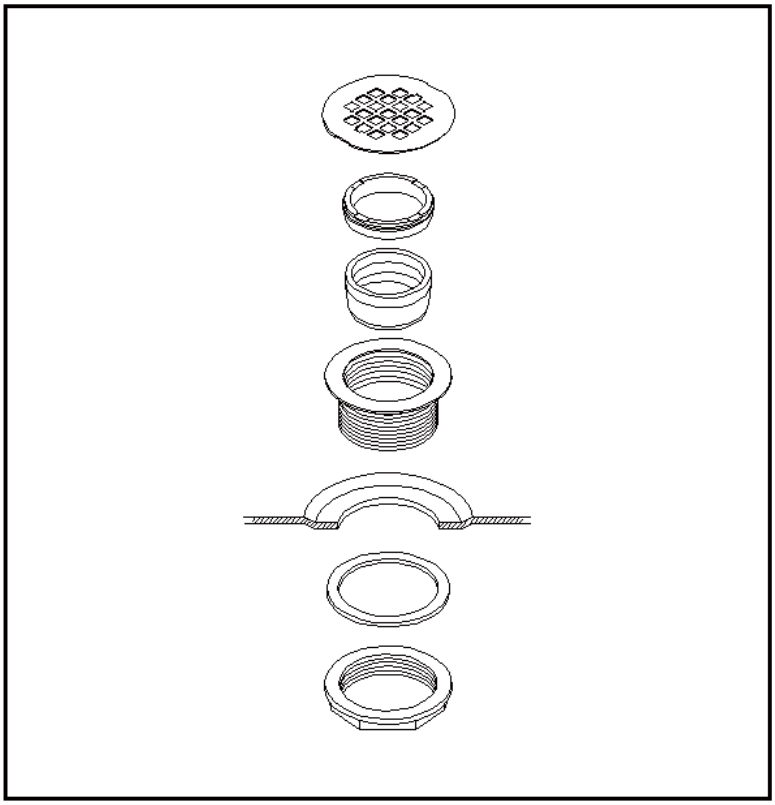

Fig. 3

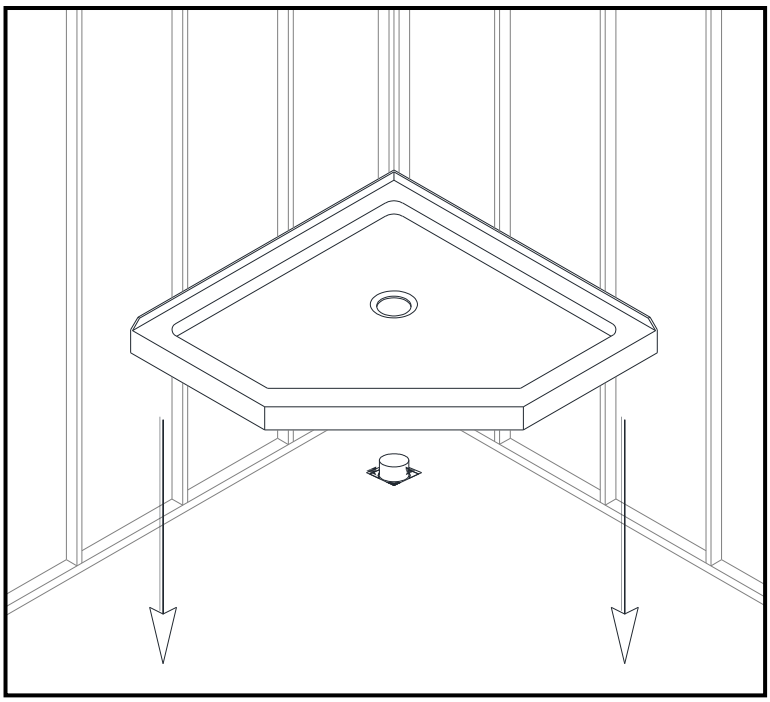
3. Place the tray into the designated position so that the Drain cutout drops around the Drain Pipe and butt the Shower Base up against the studs.

   See Fig. 4 for details.



Lower the base over the drain pipe and set it into place against the studs.

Fig. 4

©2018 DreamLine. All Rights Reserved

4. Level the tray and place marks on the studs above the upper edge of the tile flange.

   See Fig. 5 for details.

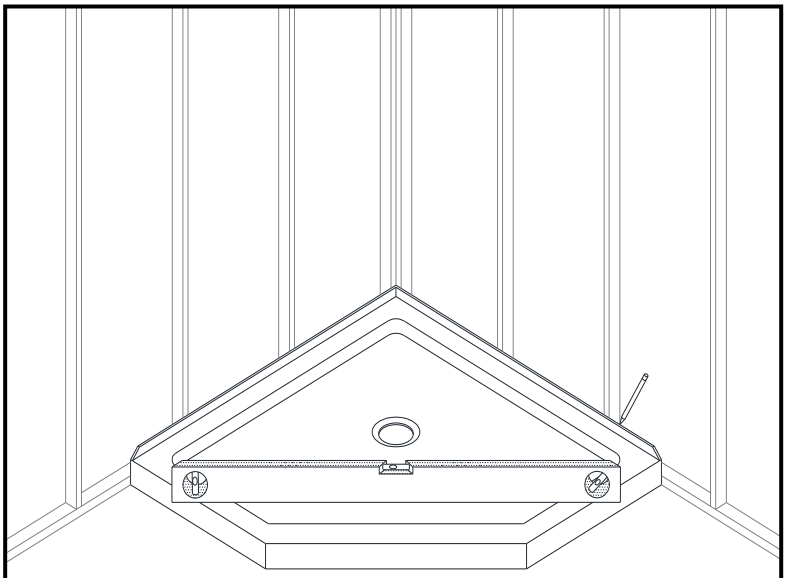


Fig. 5

5. Mix the bedding material (Mortar, cement-sand mix, etc.) **Concrete or plaster is not recommended**. Apply enough bedding material to support the entire bottom of the shower base. This will add additional stability and prevent the base from shifting position.

   See Fig. 6 for details.

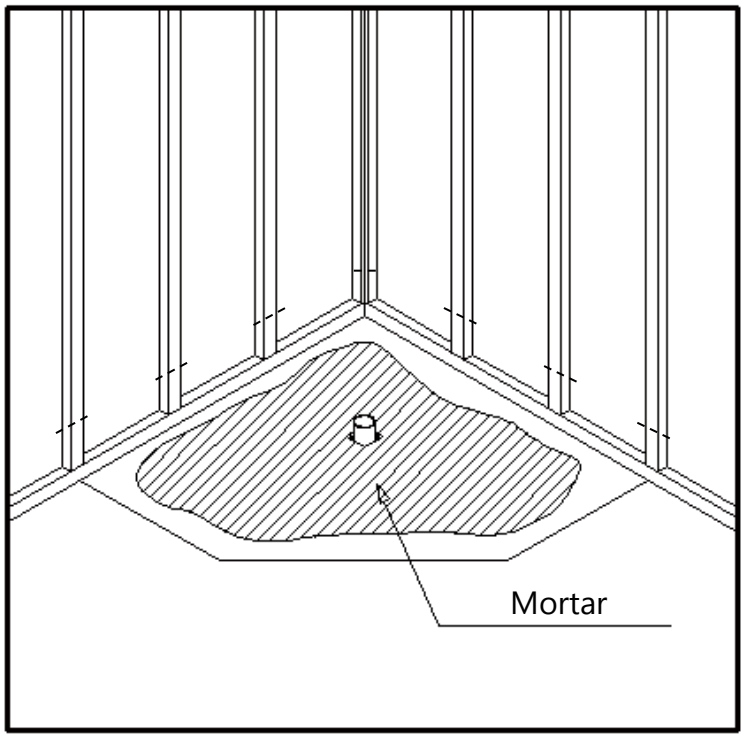

Fig. 6

©2018 DreamLine. All Rights Reserved

6. After the bedding material has been poured and *before* it sets, place the shower base into the position with the drain assembly sliding over the PVC waste pipe. It will be necessary to push the shower base until the top of the tile flange aligns with the marks drawn on the studs and the front edge is contacting the rough floor along the entire length of the shower base. Ensure that the base is level in all directions. You may need to use shims to hold the tray level until the bedding fully sets. Remove all excess mortar.

   See Fig. 7 for details.

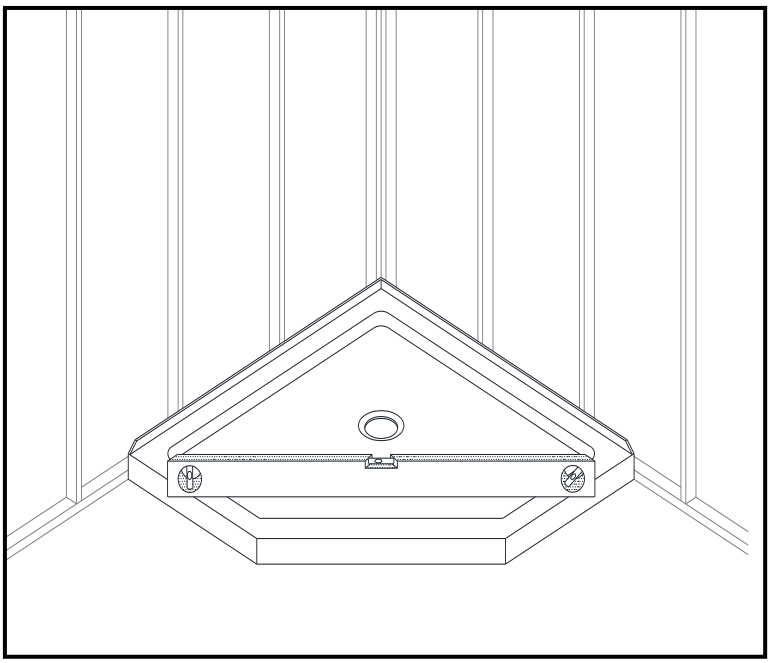

Fig. 7

7. Allow the bedding material to completely harden before applying weight to the bottom of the shower base.
   Install the cement board (or the wallboard) above the tile flanges and secure it to the studs.
   Put the tiles (or other finishing wall material) over the cement board leaving 1/8″ gap between the bottom of the tile or wall kit and the shower base. Use caulk to fill the gap.
   See Fig. 8 and Fig. 9 for details.

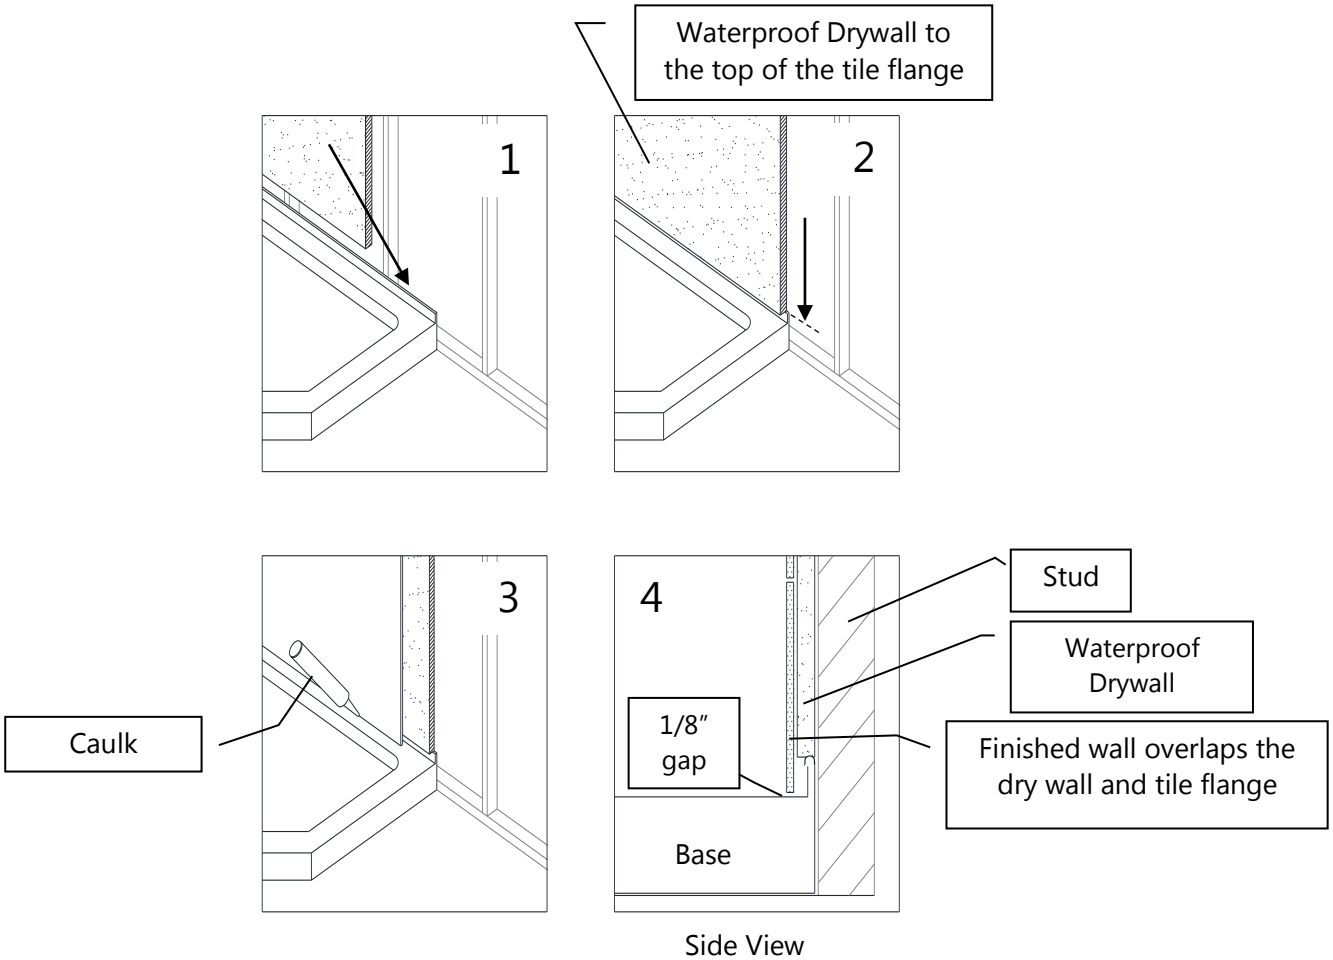

Fig. 8

Product Maintenance

BASES and BACKWALLS: To ensure long lasting life for your acrylic base and/or back walls: wipe them off after each use with a soft cloth. To clean the acrylic base or back walls use non-abrasive sprays or cream based cleaners. Avoid the use of aerosol spray cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

GLASS: To ensure long lasting life for your glass shower products: wipe them off after each use with a soft cloth. Rinse and wipe off the glass using either a soft cloth or a squeegee to prevent soap buildup and water spots (Hard water can etch the surface of the glass over time if left to dry). To prevent scratching the surface: never use abrasive cleaners or cleaning products that contain scouring agents. Never use bristle brushes or abrasive sponges that may scratch the surface.

HARDWARE: To ensure a long lasting finish: wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent damage to the finish (peeling or corrosion). After cleaning the polished finishes, rinse thoroughly and wipe dry with a soft cloth.
Clean stainless steel surfaces at least once a week. When applying stainless steel cleaner or polish to stainless steel hardware, work with (not across) the grain. Never use an abrasive sponge or cloth, steel wool or wired brush as these may permanently scratch the surfaces.

NOTE: To maximize the life of your door, it is important to regularly inspect the glass and other hardware for misalignment, proper attachment, and/or damage. Contact DreamLine with any questions or concerns.

DREAMLINE®
THE ULTIMATE SHOWER DOOR

CLEARMAX™

This model is treated with DreamLine's exclusive ClearMax™ Glass technology. This is a specially formulated coating that prevents the buildup of soap and water spots.

Install the surface with the ClearMax™ label towards the inside of the shower. Please note that depending on the model, the glass may be coated on either one or both surfaces.

For best results, squeegee the glass after each use and dry with a soft cloth.

Right-hand door installation shown

NOTE: This model is reversible for Left or Right-hand door installation. This manual will show the Left-hand door installation as an example throughout. For a Right-hand door installation, install both pivot bars with the holes on the correct side. See step #5 for details.

©2018 DreamLine. All Rights Reserved

Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with the packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the necessary parts are included in the package by checking off the components on the "Detailed Diagram of Shower Door Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. **Please note that DreamLine® will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed.** Contact DreamLine® if you have any questions, and please provide an order number, job name or other proof of purchase to help identify the original order.

2. **Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location, and DreamLine® is not responsible for code compliance standards for your project and will not accept any returns.**

3. If this unit is going to be installed in a new construction, please install all of the required plumbing and drainage before installing the shower. Use a competent and licensed (if required by local code) plumber for all plumbing installation

4. Make sure that prior to beginning the installation, the surfaces are leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. Irregular installation surface level, radius corners or improper angle of side walls will result in serious problems for your installation. Note that some adjustments and drilling will be necessary during the installation process.

5. Protect all primary surfaces of the product during installation. Never set the glass down directly onto a tile floor. Leave corner protectors in place until necessary to remove them. Always use a piece of wood or cardboard to protect the bottom edge and corners of the glass prior to and during installation.

6. **This unit must be installed upon a level finished threshold and against finished walls.**

7. **This model has 3/8" of adjustment for out-of-plumb wall conditions using the adjustable wall profiles** Make sure that the walls are within this range before proceeding with the installation.

8. **Professional installation recommended.**

NOTE: **DO NOT** attach the handle to the door glass or the towel bar to the panel glass until instructed.
DO NOT use the handle or towel bar to lift the glass during installation. This may result in damage to the glass and/or serious injury. Always use an assistant or a professional grade glass suction cup when handling heavy glass.

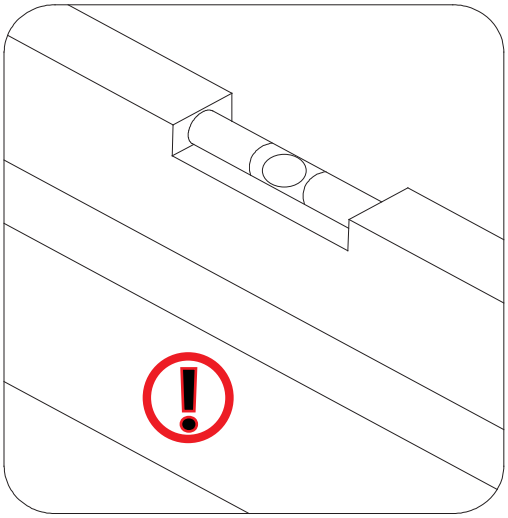
Tip: Measure the finished opening before proceeding with the installation to be sure that the correct model size has been ordered.

Tip: Prior to installation, cover the shower/tub drain with tape to prevent losing screws or small parts.

Tip: Set screw gun clutch to low setting when installing screws and bolts to prevent stripping the heads.

Threshold must be level.



NOTE: Unpack your unit carefully and inspect it. Lay it out and identify all parts using the detailed diagram and packing list in this manual as a reference. Before discarding the carton, check for small hardware bags that may have fallen to the bottom of the box. If any parts are damaged or missing, please contact DreamLine® for replacement. The shipping boxes may contain extra parts not used in your model configuration.

NOTE: Retain these installation instructions for future reference.

©2018 DreamLine. All Rights Reserved

Installation steps

1. Apply clear 100% silicone into the **Glass Profiles (#01)** and firmly attach the **Glass Profiles (#01)** to the correct edge* of the **Panel Glass (#03).**
Carefully set the **Panel Glass (#03)** assemblies aside. **(Fig 1a)**

***NOTE:** The holes (for the pivot bar) should be on the opposite edge from the glass profile. **(Fig 1b)**

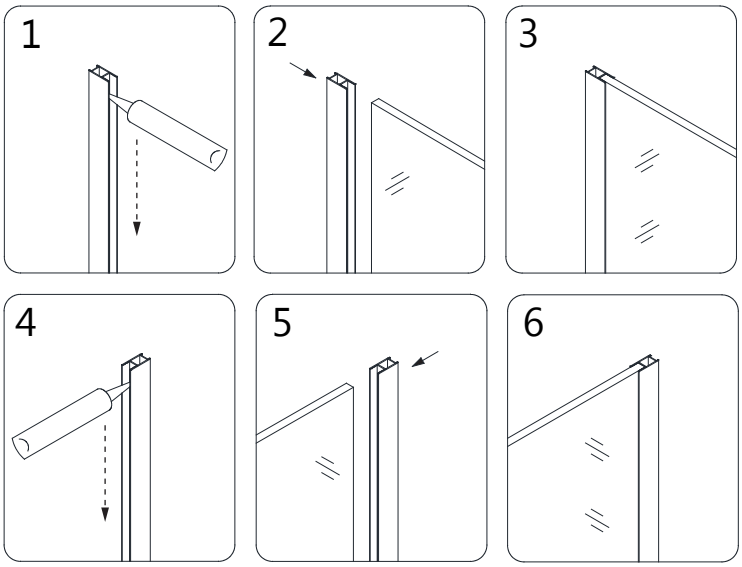

Fig 1a

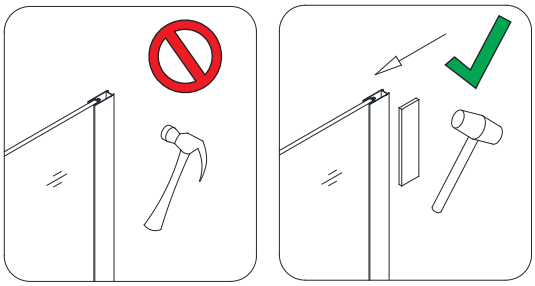
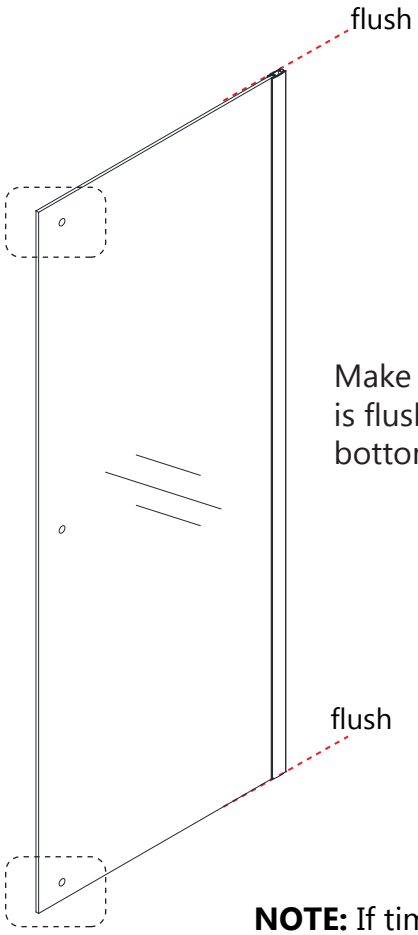
NOTE: If there is difficulty sliding the **Glass Profiles (#01)** on to the **Panel Glass (#03)**, lightly tap on the Glass Profile with a rubber mallet and a piece of wood.
Do Not strike the profile directly with a hammer.





Make sure that the glass profile is flush/even with the top and bottom of the panel glass.

Attach the **Glass Profile(s) (#01)** to the **edge opposite of the holes.**

Fig 1b

NOTE: If time allows, do not handle the panel glass until the silicone holding the glass profile has fully cured. This prevents the glass profile from slipping out of postion during installation or adjustment.

©2018 DreamLine. All Rights Reserved

2. Mark the wall at the threshold according to the dimensions for the model size shown in **Table 1** below.

Place the **Wall Profiles (#02)** against the walls and aligned with the new reference marks on the threshold. Use a level to plumb each wall profile. **(Table 1, Fig 2a and Fig 2b)**

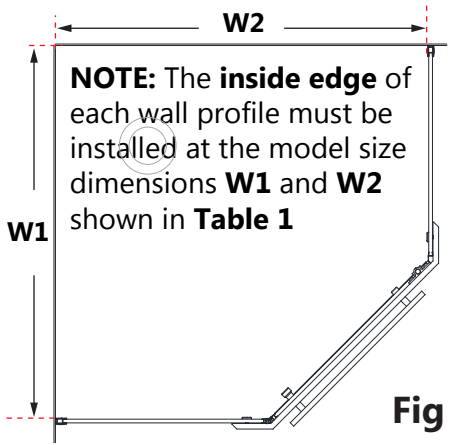


Fig 2a

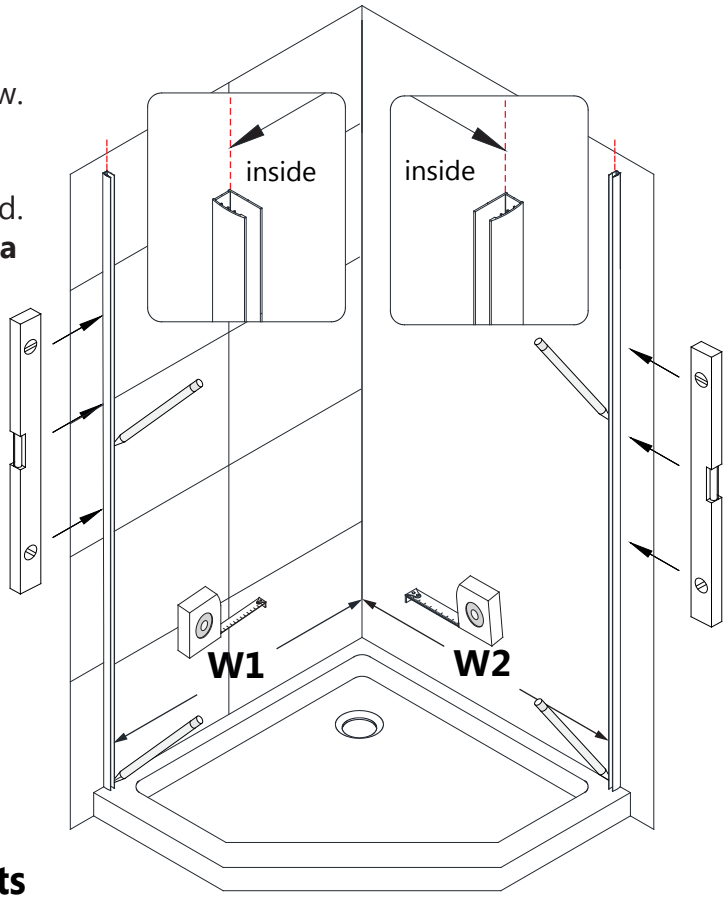

Fig 2b

Table 1 - Enclosure assembly measurements

Measure from the finished corner to the inside edge of wall profile as shown:		
Glass Box SKU /Model #	**W1**	**W2**
SHEN-GLP2101-343410	33-7/16"	33-7/16"
SHEN-GLP2101-363610	35-7/16"	35-7/16"
SHEN-GLP2101-383810	37-7/16"	37-7/16"
SHEN-GLP2101-404010	39-7/16"	39-7/16"

3. Make sure each **Wall Profile (#02)** is plumb. Mark the holes for drilling on the wall through the predrilled holes in the **Wall Profile (#02)**. Drill the holes in the wall using a **Ø5/16"** drill bit and insert the **Wall Anchors (#08)**.

Run a bead of waterproof silicone along the back of the **Wall Profiles (#02)** and around the holes in the wall. Attach the **Wall Profile (#02)** to the wall using the **Truss Head Screws ST4.2×40 (#11)**. **(Fig 3)**

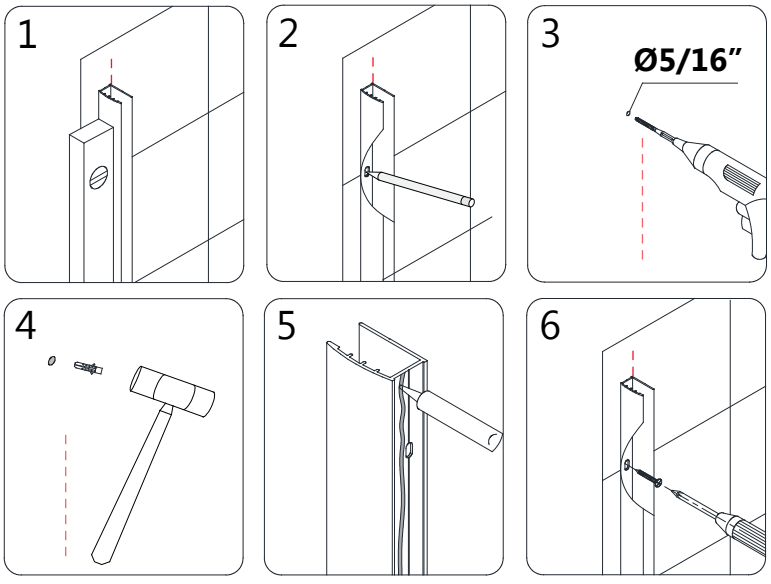

Fig 3

©2018 DreamLine. All Rights Reserved

4. Be sure the **Panel Glass (#03)** and **Glass Profiles (#01)** have had time to set up before handling. Insert each assembled **Panel Glass (#03)** and **Glass Profile (#01)** into the installed **Wall Profiles (#03)** and check the panels for plumb. If necessary, adjustments can be made by moving the **Glass Profiles (#01)** within the **Wall Profiles (#03).** Use caution not to pull the **Panel Glass (#03)** out of the **Glass Profiles (#01). (Fig 4a and Fig 4b)**

NOTE: Use caution not to bang the panel glass on the threshold.

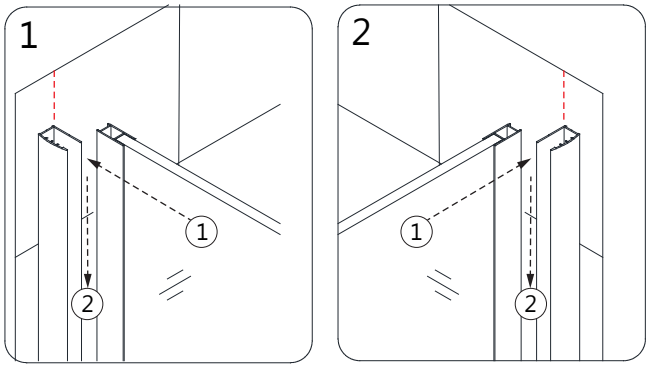

Fig 4a

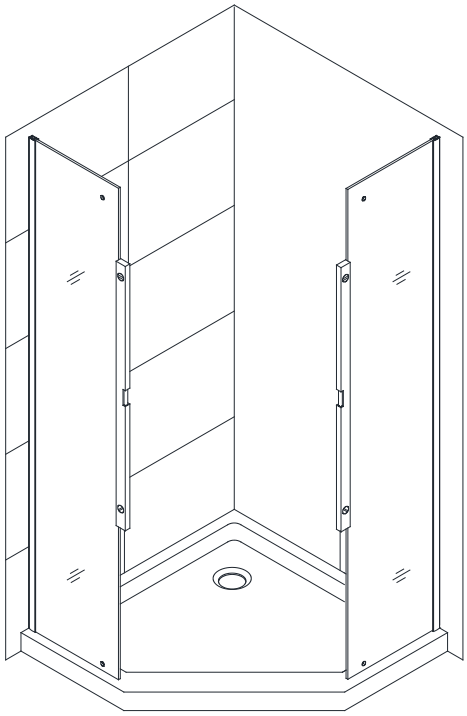

Fig 4b

5. Examine the **Pivot Bars (#05)** and notice that there are holes for the top and bottom pivot assemblies on one end. Attach the top and bottom **Pivot Bars (#05)** (with the pivot holes on the correct side for the swing of the door) through the holes in the **Panel Glass (#03).**
Put the clear **Vinyl Gaskets (#15)** between the **Pivot Bars (#05)** and the **Panel Glass (#03)** to prevent glass-to-metal contact. Use the **Hex Socket Bolts M8×25 (#17)** and **Decorative Washer (#18)** to attach the **Pivot Bars (#05)** to the **Panel Glass (#03)**. **(Fig 5a and Fig 5b)**

Left-hand door installation shown as an example

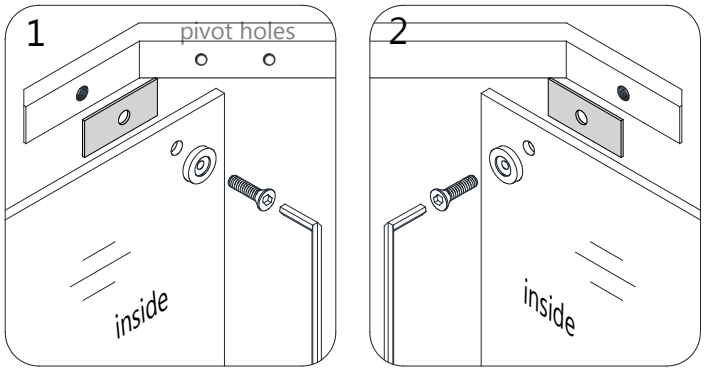

Fig 5a

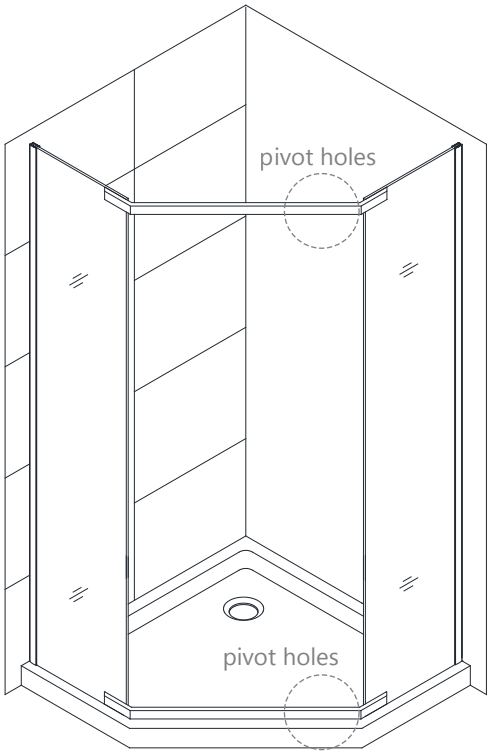

Fig 5b

Be sure to install both of the **Pivot Bars (#05)** with the pivot holes on the correct side for the desired swing of the door.

©2018 DreamLine. All Rights Reserved

Before installing the door glass, attach the longer Magnetic Strike Vinyl (#12) to the strike edge of the Panel Glass (#03) (the panel that the door will close against) to protect the edge of the door glass from making contact with the panel glass during installation. (See Step 8, Fig 8.4)

6. The pivot assemblies are paired: one rotates CW and one rotates CCW. Take note to install the **Pivot Assemblies (#07)** to the top and bottom **Pivot Bars (#05)** so that the door will swing out. Attach the top and bottom **Pivot Assemblies (#07)** to the **Pivot Bars (#05)** using the **Hex Socket Bolts M8×12 (#16)**.
Remove the bolts and plates from the **Pivot Assemblies (#07)**. Set the **Door Glass (#04)** into the pivots so that the holes are aligned. **Make sure the vinyl gaskets are in place between the glass and the metal plates.** Firmly secure the back plate with the provided bolt. **(Fig 6)**

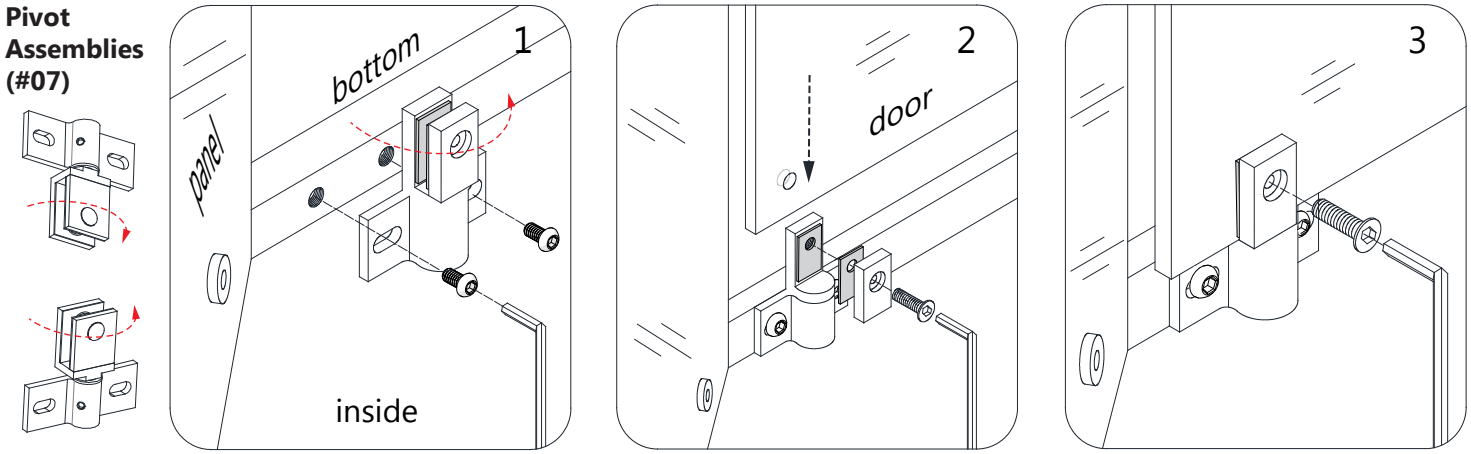

Fig 6

Left-hand door installation shown

Tip: Attach both pivot assemblies to the pivot bars as shown in Step 6 and install the door glass to the Pivot Assemblies OR attach the bottom pivot assembly to the bottom pivot bar and the top pivot assembly to the door glass and install the door.

7. Make any final adjustments using the adjustable wall profiles so that the door opening is square. Drill through the predrilled holes in the **Wall Profiles (#02)** into the first layer of the **Glass Profiles (#01)** using an **Ø1/8"** drill bit.
Use the **Pan Head Screws ST4.2×10 (#10)** and washers to secure the **Glass Profiles (#01)** inside the **Wall Profiles (#02)**. Cover the screws with the **Decorative Covers (#09)**. **(Fig 7)**

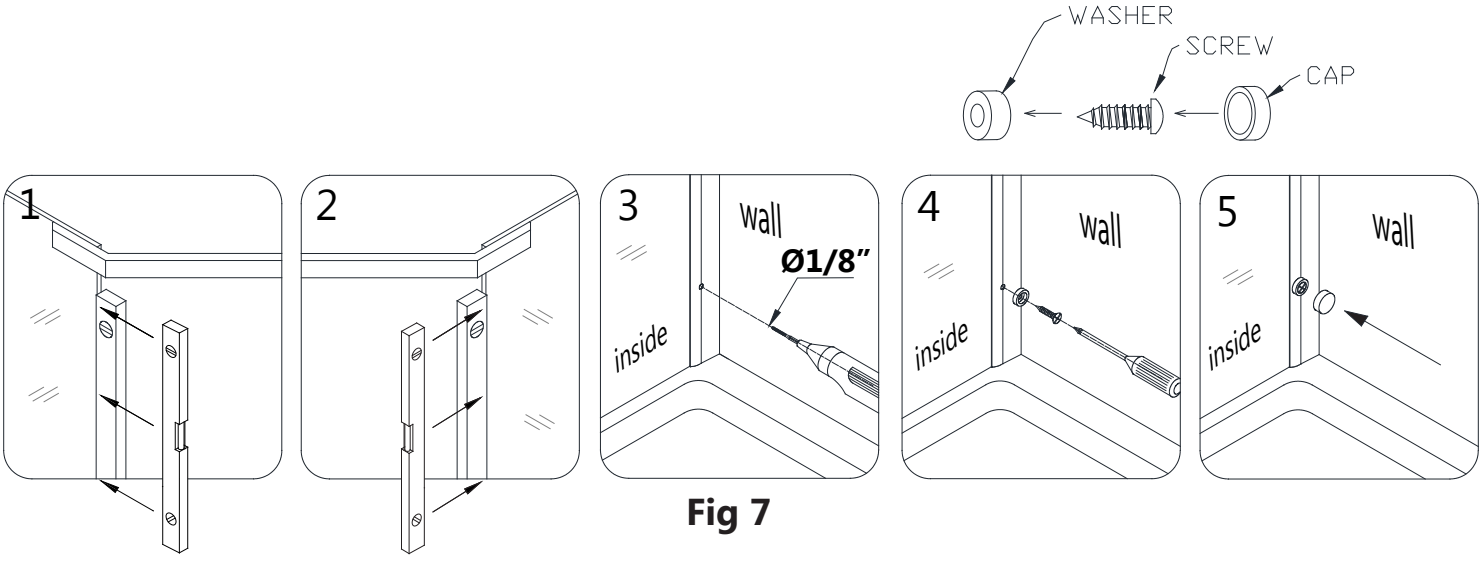

Fig 7

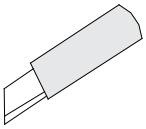
©2018 DreamLine. All Rights Reserved

8. Push the **Hinge-Side Vinyl Seal (#14)** onto the pivot edge of the **Door Glass (#04)** with the soft fin on the inside of the shower so that it overlaps the **Panel Glass (#03)** when the door is closed. **(Fig 8.1)**

Cut the **Sweep Vinyl Seal (#13)** to fit from the bottom pivot to the strike edge of the **Door Glass (#04)**. (the mitered end of the Sweep Vinyl Seal goes on the strike side of the door)
Firmly push the **Sweep Vinyl Seal (#13)** onto the bottom edge of the **Door Glass (#04)**.
Trim a 1" piece from the cut-off of the **Sweep Vinyl Seal (#13)** to fit onto the opposite side of the bottom pivot and attach it to the bottom of the door glass. **(Fig 8.3)**
Note: The fin on the **Sweep Vinyl Seal (#13)** should be installed toward the inside of the shower. **(Fig 8.2)**

Push the shorter **Magnetic Strike Vinyl (#12)** onto the strike edge of the **Door Glass (#04).** Notch the bottom of this **Magnetic Strike Vinyl (#12)** to fit around the **Sweep Vinyl Seal (#13). (Fig 8.5)**
Attach the longer **Magnetic Strike Vinyl (#12)** to the strike edge of the **Panel Glass (#03)**.
When correctly installed, the **Magnetic Strike Vinyl (#12)** will form an outside 45-degree angle.
Adjust as necessary to get a tight seal. **(Fig 8)**



NOTE: Trim off the excess **Sweep Vinyl Seal (#13)** and attach a 1" piece onto the opposite side of the Bottom Pivot. **(Fig 8.3)**

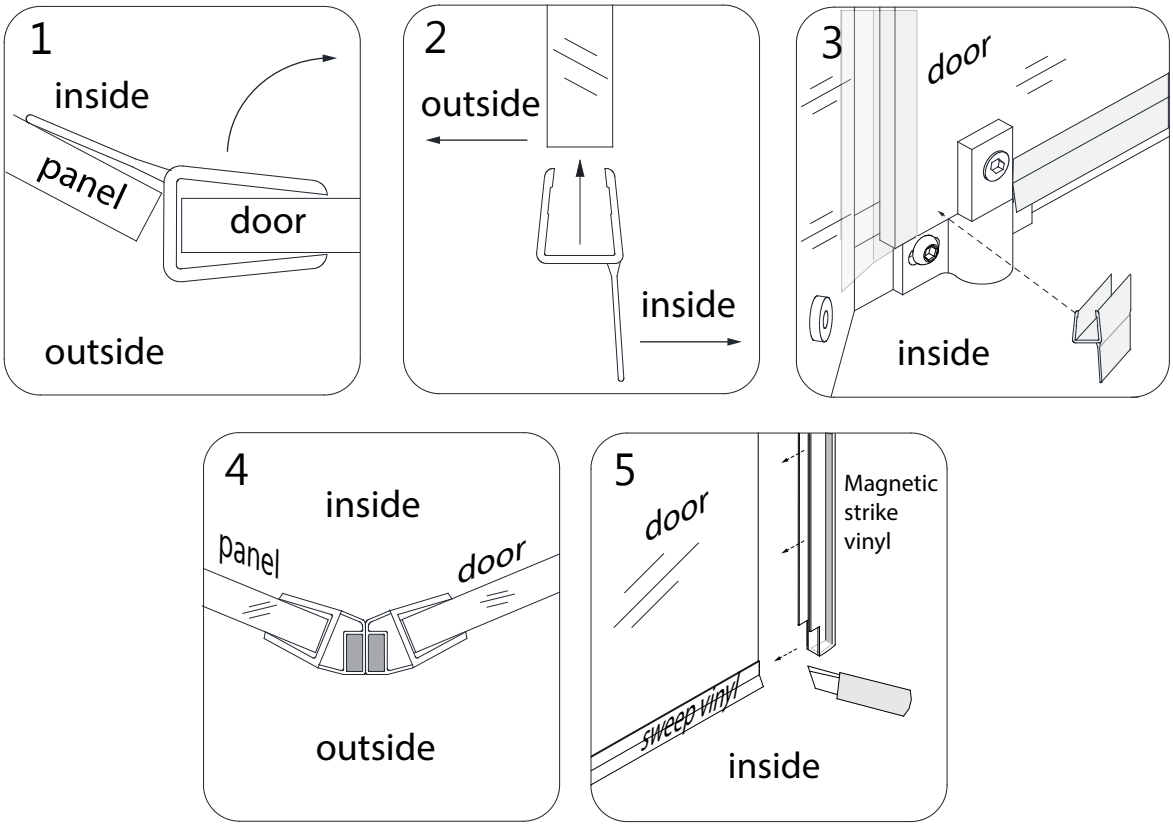


Fig 8

Left-hand door installation shown

©2018 DreamLine. All Rights Reserved

9. Install the **Handle (#06)** onto the outside of the **Door Glass (#04)**. **(Fig 9)**
(put the knob on the magnet/strike side of the door)

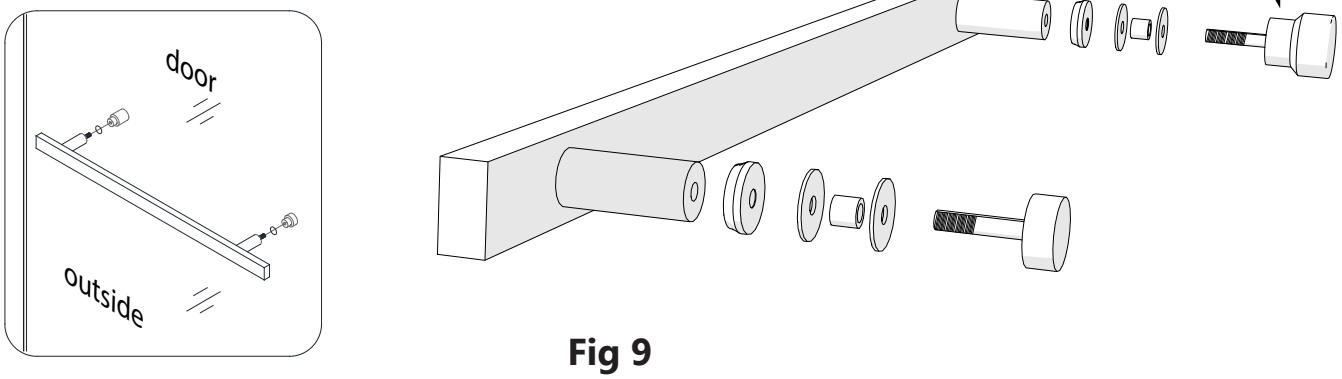

Fig 9

10. Apply a good quality mildew-resistant silicone along the interior edges of the **Panel Glass (#03)**, **Wall Profiles (#02)** and **Pivot Bar (#05)** to seal against the walls and threshold. **(Fig 10)**

Allow 24 hours for the silicone to cure before using the shower.

Product Maintenance

BASES and BACKWALLS: To ensure long-lasting life for your acrylic back walls, wipe them off after each use with a soft cloth. To clean the acrylic back walls use non-abrasive sprays or cream based cleaners. Avoid the use of aerosol spray cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

GLASS: To ensure long-lasting life for your glass shower products, wipe them off after each use with a soft cloth. Rinse and wipe off the glass using either a soft cloth or a squeegee to prevent soap buildup and water spots (Hard water can etch the surface of the glass over time if left to dry). To prevent scratching the surface: never use abrasive cleaners or cleaning products that contain scouring agents. Never use bristle brushes or abrasive sponges that may scratch the surface.

HARDWARE: To ensure a long-lasting finish, wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent damage to the finish (peeling or corrosion). After cleaning the polished finishes, rinse thoroughly and wipe dry with a soft cloth. Clean stainless steel surfaces at least once a week. When applying stainless steel cleaner or polish to stainless steel hardware, work with (not across) the grain. Never use an abrasive sponge or cloth, steel wool or wired brush as these may permanently scratch the surfaces.

NOTE: To maximize the life of your door, it is important to regularly inspect the glass and all hardware for misalignment, proper attachment, and/or damage. Contact DreamLine® with any questions or concerns.

DreamLine® shower doors and enclosures are designed not to leak when installed properly and the flow of water is not pointed directly at the pivots or vinyl seals.
