

Athens Vanity Cabinets: E645-V60D-GW E645-V60D-MCA

Assembly / Installation Instructions

Important Notes:

This vanity cabinet may be used freestanding, or may be mounted to a Wall (floating).
 If you are using this cabinet as a freestanding unit, please refer to pages 05.
 If you are using this cabinet as a Wall mounted (floating) unit, please refer to pages 01 - 05.

* For your safety and to achieve the best possible installation of this vanity cabinet, James Martin Vanities always recommends you consult with a professional contractor. Two people are required for the assembly and installation of this vanity cabinet.

Step 1 Notes:

To prepare the cabinet for Wall mounting, you need to remove the attached wooden base. Please place a blanket or other soft material on the floor and then place the cabinet on its back.

A = 12PCS Bolt 1/4" x 2"

B = 1PC Allen Wrench #04

C = 12PCS Spring Washer 1/4"

D = 12PCS Flat Washer 1/4" x 5/8"

Step 2 Notes:

Please locate the red hardware bag which is included with the cabinet. You will need the hex key (allen) wrench to remove the bolts and washers from the base. Please keep the removed hardware and wrench for possible use in the future.

Assembly / Installation Instructions

Materials for Installation:

Drill

Level

Tape Measuring

Pencil

Stud Finder

F Pre-attached metal mounting (French Cleat) brackets**Step 3 Notes:**

The metal mounting brackets has been pre-installed to the backside of the cabinet 13 3/8" from the bottom of the cabinet, remove one piece from the back of the cabinet .

Step 4 Notes:

Draw a horizontal line on the wall at your desired height. For this cabinet, most people use a height of 23 3/8"

Step 5 Notes:

Locate and mark the position of the Wall's interior studs to which you will fasten the metal bracket. We recommend the use of an electronic stud finder to locate the studs.

(Alternately, you may find studs by listening for a solid sound as you knock on the Wall)

Special Note 1:

If the studs in your bathroom do not line up to the mounting location for your vanity, additional wood blocking can be installed between the studs using standard 2 x 4 lumber.

Special Note 2:

Due to the narrow width of this cabinet, you may decide to use dryWall anchors if the Wall studs are not spaced appropriately.

**IMPORTANT:**

James Martin Vanities recommended you always consult with professional installers and contractors regarding the correct installation of our products.

 Assembly / Installation Instructions

**Materials
 for
 Installation:**

Drill

Pencil

Hammer

E=11PCS Drywall Anchor Ø8*38

F=1PC Metal Brackett 1070mm

G=11PCS Screws Ø4*40

Step 6 Notes:

After you have located the wall studs, position the metal bracket so the holes align with the center points of the studs. Mark these positions with a pencil.

Step 7 Notes:

Drill holes for the screws in the positions you have marked with the pencil. Drill the holes' depth no less than 1 1/2", insert "E" to the holes by using hammer.
