Karolina™ by Aquatica

The sheer simplicity and organic shaping of our beautiful new freestanding Karolina™ bathtub reflects a unique understanding of the elemental nature of bathing luxury. Inspired by the deep basins found in nature, this freestanding bathtub cradles the body in the utmost comfort, with deep, graceful sides crafted from solid AquaStone™ which sensuously curve to gently support and pamper the bather.

The elegant lines and natural stone-like quality of Karolina™ create an instant 'I want' factor in any bathroom environment whilst providing the ultimate bathing experience that is simply divine.

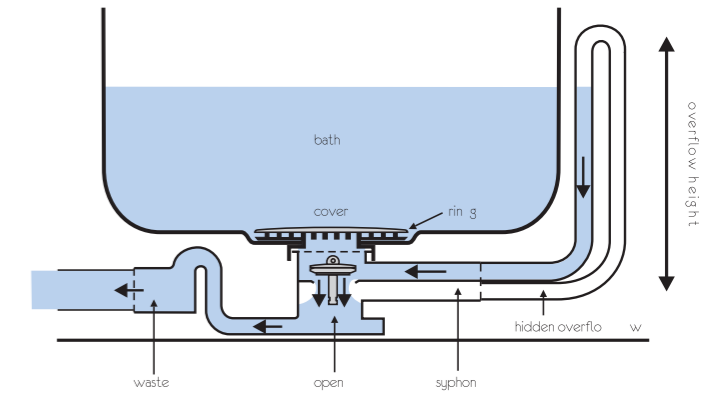

Hidden overflow system

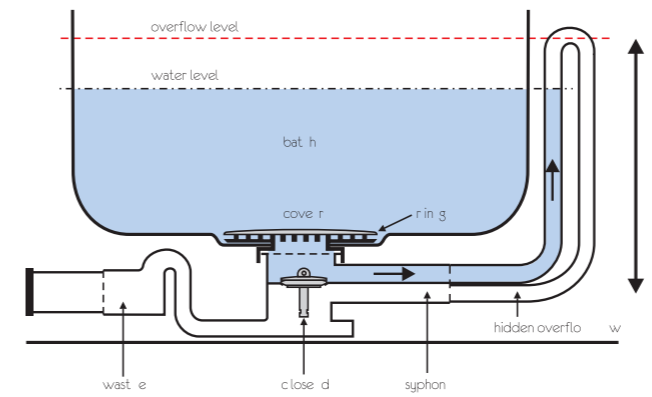

Aquatica's Concealed Waste-Overflow System is based on the scientific principle of equal water levels in communicating vessels.

How it works

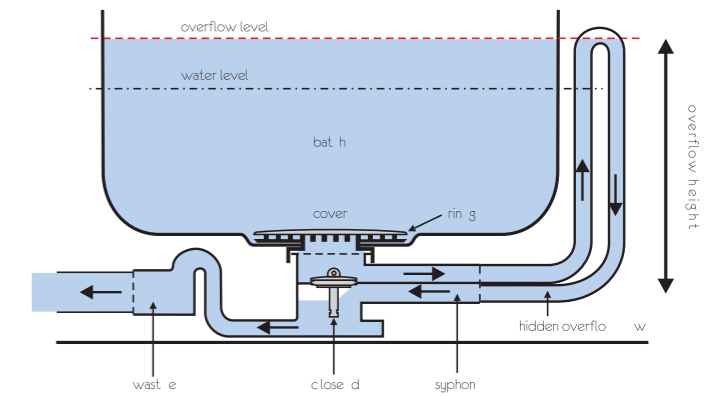

The Concealed Waste-Overflow System from Aquatica is a combined hidden overflow, waste and plug system. Instead of a traditional overflow hole, hidden behind the bath is a twin pipe overflow that is connected direct to the waste. When you fill the bath with water - one side of the overflow pipe fills - exactly to the same level as the bath. If you overflow the bath - the water in one side of the overflow pipe will filter up and over the bend down the other side of the overflow pipe, directly into the waste system.

Waste open

Waste closed, safe water level

Waste closed, overflow level

Karolina™ makes bathing blissful

Not only does the classic shape and smooth, uninterrupted lines of this stunning bathtub allow you to immerse yourself in its decadent comfort. It also brings together everything you could want in the ideal bathtub - exquisite beauty, superbly crafted quality, modern durability and innovative technology.

For those who seek the timeless elegance of stone, Aquatica has developed AquaStone™, a technologically advanced, solid composite material that consists of a high percentage of natural stone minerals combined with a low percentage of acrylic resin. This material is hypoallergenic, non-toxic, 100% recyclable and durable. It is non-porous for increased ease of cleaning and has a sublimely velvet-like feel.

For those inspired by innovative solutions to bathroom comfort and ease of use, Karolina applies new generation technology such as our new concealed waste-overflow system to deliver an uncompromised design that is a joy to use, maintenance free and a pleasure to clean.

Karolina™ makes bathing better

The beauty of Karolina™ is matched by the stunning simplicity of its operation. The designers of this freestanding bath have cleverly incorporated cutting edge technologies in order to maintain the clean purity of its style without compromising function.

Aquatica's clever state-of-the-art hidden overflow system eliminates the need for a visible overflow outlet. Instead, the overflow is concealed between the inner and exterior bath walls operates on the principles of self-equaling water levels. Should you overflow the bath, the water which normally sits at the same level as the level in the bath, is pushed from one side of the overflow pipe to the other, which then feeds the overflowing water out through the waste outlet.

The overflow system also allows you to fill the bath to a higher level than normal, again increasing the overall depth of the bath without increasing the bath's actual height from the floor. Unlike traditional cable-drive waste-overflow fittings, our new concealed waste-overflow system has no moving parts and is practically maintenance free.

Turn bathing from a function to a ritual with Karolina™.

WARRANTY

Our confidence in the quality and reliability enables us to guarantee the Karolina™ bath for 25 years and the working components like the waste fitting for 5 years from date of purchase. The guarantee does not cover general wear and tear. Our guarantee is offered on all baths that have been used in the manner for which they were intended, and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our installation instructions and local plumbing codes. The warranty covers products in domestic use by the consumer and not commercial or business use.
